## NL Voorwoord

Vanaf 2023 zal Dauby met gedrukte productoverzichten werken in plaats van een prijslijst. In dit overzicht kan u alle info over de producten terugvinden, zoals artikelnummer, omschrijving, beschikbare materialen etc.

Voor de actuele prijzen kan u de **Excelprijslijst** downloaden of onze website raadplegen. De productoverzichten zijn opgedeeld in twee exemplaren:

- 1) Pure, Pure Plus, Pure Curtains, Pure Tiles, CDF & CDL
- 2) Giara, Fama, Fama Design, Fama Artwork, Rds, Rds Bronze, Kleis & Frascio, Galbusera

Op die manier kunnen we snel inspelen op prijswijzigingen en blijven onze catalogen actueel.

Naast de productoverzichten zijn er ook per collectie de catalogi voor extra inspiratie. Vraag ernaar indien u de catalogi nog niet hebt.

Technische fiches, 3D tekeningen en productspecificaties kan u terugvinden in de catalogi en op onze website [www.dauby.be](http://www.dauby.be).

Vergeet ook niet de inhoudsopgave te raadplegen: per collectie is er een inleiding met uitleg over de verschillende materialen.

Elke collectie is onderverdeeld per categorie: binnendeurbeslag, scharnieren, raam-, buitendeur-, en meubelbeslag.

Mochten er zaken niet duidelijk zijn, vraag het ons!

## FR Introduction

À partir de 2023, Dauby travaillera avec des listes de produits imprimés au lieu d'une liste de prix. Dans cette liste, vous pouvez trouver toutes les informations sur les produits, comme le numéro d'article, la description, les matériaux disponibles, etc.

Pour connaître les prix actuels, vous pouvez télécharger la **liste de prix Excel** ou consulter notre site web.

Les aperçus de produits sont divisés en deux exemplaires :

- 1) Pure, Pure Plus, Pure Curtains, Pure Tiles, CDF & CDL
- 2) Giara, Fama, Fama Design, Fama Artwork, Rds, Rds Bronze, Kleis & Frascio, Galbusera

Cela nous permet de réagir rapidement aux changements de prix et de maintenir nos catalogues à jour.

En plus des listes de produits, il existe également des catalogues pour chaque collection, pour une inspiration supplémentaire. Demandez-les si vous ne les avez pas encore.

Les fiches techniques, les dessins en 3D et les spécifications des produits sont disponibles dans les catalogues et sur notre site web [www.dauby.be](http://www.dauby.be).

N'oubliez pas de consulter la table des matières : chaque collection comporte une introduction expliquant les différents matériaux.

Chaque collection est divisée par catégorie : quincailleries de portes intérieures, paumelles, fenêtres, portes extérieures et quincailleries de meubles.

Si quelque chose n'est pas clair, n'hésitez pas à nous le demander !

## DE Vorwort

Ab 2023 wird Dauby mit gedruckten Produktlisten anstelle von Preislisten arbeiten. In dieser Liste finden Sie alle Informationen zu den Produkten, wie z.B. Artikelnummer, Beschreibung, verfügbare Materialien, etc.

Für die aktuellen Preise können Sie die **Excel-Preisliste** herunterladen oder unsere Website konsultieren.

Die Produktlisten sind in zwei Exemplare aufgeteilt:

- 1) Pure, Pure Plus, Pure Vorhänge, Pure Kacheln, CDF & CDL
- 2) Giara, Fama, Fama Design, Fama Artwork, Rds, Rds Bronze, Kleis & Frascio, Galbusera

So können wir schnell auf Preisänderungen reagieren und unsere Kataloge auf dem neuesten Stand halten.

Zusätzlich zu den Produktlisten gibt es auch Kataloge für jede Kollektion, die zusätzliche Inspiration bieten. Fordern Sie sie an, wenn Sie sie noch nicht haben.

Technische Datenblätter, 3D-Zeichnungen und Produktspezifikationen finden Sie in den Katalogen und auf unserer Website [www.dauby.be](http://www.dauby.be).

Vergessen Sie nicht, das Inhaltsverzeichnis zu konsultieren: Zu jeder Kollektion gibt es eine Einführung, in der die verschiedenen Materialien erläutert werden.

Jede Kollektion ist nach Kategorien unterteilt: Innentürbeschläge, Scharniere, Fenster, Außentüren und Möbelbeschläge.

Wenn etwas unklar ist, fragen Sie uns bitte!

## EN Introduction

From 2023, Dauby will work with printed product lists instead of a price list. In this list you can find all info about the products, such as article number, description, available materials, etc.

For the current prices, you can download the **Excel price list** or consult our website.

The product lists are divided into two copies:

- 1) Pure, Pure Plus, Pure Curtains, Pure Tiles, CDF & CDL
- 2) Giara, Fama, Fama Design, Fama Artwork, Rds, Rds Bronze, Kleis & Frascio, Galbusera

This allows us to respond quickly to price changes and keeps our catalogues up to date.

In addition to the product lists, there are also catalogues for each collection for extra inspiration. Ask for them if you do not yet have them.

Technical data sheets, 3D drawings and product specifications can be found in the catalogues and on our website [www.dauby.be](http://www.dauby.be).

Don't forget to consult the table of contents: each collection has an introduction explaining the various materials.

Each collection is divided by category: internal door fittings, hinges, window, external door and furniture fittings.

If anything is not clear, please ask us!

# NL Materialenwijzer

Elke product is gemaakt uit natuurlijke materialen van hoogstaande kwaliteit. Om meer van dit unieke karakter te genieten, geven we u enkele specifieke eigenschappen van onze materialen mee.

De kleurschakeringen in onze producten worden na verloop van tijd nog intenser, dit heet **living finish**.

We adviseren om de natuurlijke verandering zijn gang te laten gaan. Dit geeft het materiaal een warme uitstraling en authentiek karakter. **Onderhoud is dus niet nodig!**

## Materialen met kleurverandering

**Oxiderende materialen:** kleurverandering door externe factoren zoals zuurstof, water, vocht, zon,...

Materiaal	Kleurverandering na verloop van tijd	Onderhoudstip
Britannium (BRI) / Verouderd Nikkel (NA)	Mat grijs, tin kleur	Zilverpoets
Wit Brons (WB)	Matter (miniem)	Zilverpoets
Licht Brons (LB/NB/RBP)	Matter / donkerbruin	Koperpoets
Verzilverd Wit Brons (BS)	Mat grijs	Zilverpoets
Roest (RC)	Boenwas	Opboenen met bijenwas, boenwas of vase-line
Ruw Messing (UB)	Matter / donkerbruin	Koperpoets
Geborsteld Messing (OS)	Donkerder	Chroompoets

Als u toch de oorspronkelijke lichte glans wil behouden, kan u de doffe corrosielaag opboenen met een zachte doek en zilver-, of koperpoets

**Geoxideerde materialen/ patine / living finish:** kleurverandering door frequent gebruik

Materiaal	Kleurverandering door gebruik	
Verdonkerd Brons (AZ/DB)	Licht Brons	Door frequent gebruik poetst u het materiaal automatisch op waardoor een lichte glans verschijnt
Groen Brons (VI/OG)	Donkerbrons tot licht brons	
Oud Tin (OPW)	Zilverkleur	
Ruw Metaal (RM)	Lichte glans	
Ruw Brons (RB)	Lichte glans	
Mat wit Brons (WBS)	Lichte glans	

## Uitvoeringen met een coating

Dauby werkt met een coating van uitzonderlijke kwaliteit die zeer sterk is, maar er bestaat geen enkele coating die volledig krasvrij is. Een verweerde look geeft uw product een authentiek karakter!

Materiaal	Kleurverandering na verloop van tijd	Onderhoudstip
Verouderd ijzer (VO)	Zwart	Opnieuw lakken
Zwart (N)	Zwart	Opnieuw lakken
Smeedijzer (FP)	Vernis	Opnieuw vernissen
Aged Silver (AS)	Zilverkleurig	Onomkeerbaar
Aged Iron (AI)	Ijzerkleurig	Onomkeerbaar
Zwart Brons (BLK)	Zwart	Onomkeerbaar
Night Bronze (NIB)	/	Onomkeerbaar

Geen enkele coating heeft een eeuwige garantie! Externe factoren kunnen de coating beschadigen, zoals scherpe voorwerpen en ringen. Ook langdurig frequent gebruik laat zijn sporen na.

**In geen geval schuur- of agressieve schoonmaakmiddelen gebruiken!**

Chaque produit a été fabriqué à l'aide de matériaux naturels de qualité supérieure. Pour que vous puissiez profiter davantage de son caractère unique, nous vous indiquons ci-dessous quelques caractéristiques de nos matériaux.

Les nuances des couleurs de nos produits deviennent encore plus intenses au fil du temps. C'est ce qu'on appelle le living finish.

Nous vous conseillons de laisser l'évolution naturelle suivre son cours, car elle confère au matériau un rayonnement chaleureux et un caractère authentique. **Aucun entretien n'est donc requis.**

## Matériaux qui changent de couleur

**Matériaux oxydants** : changement de couleur dû à des facteurs comme l'oxygène, l'eau, l'humidité, le soleil,....

Matériau	Changement de couleur au fil du temps	Conseil d'entretien
Britannium (BRI) / Nickel Vieilli (NA)	Gris mat, couleur étain	Polish pour argent
Bronze Blanc (WB)	Plus mat (minime)	Polish pour argent
Bronze Naturel (LB/NB/RBP)	Plus mat / Brun foncé	Polish pour cuivre
Argent (BS)	Gris mat	Polish pour argent
Rouillé Ciré (RC)	Cire d'abeille	Cire d'abeille, encaustique ou vaseline
Laiton Brut (UB)	Plus mat / Brun foncé	Polish pour cuivre
Laiton Brossé (OS)	Plus foncé	Polish pour chrome

Pour conserver le brillant initial, vous pouvez éliminer la couche mate de corrosion en cirant à l'aide d'un chiffon doux et d'un polish pour argent ou cuivre.

**Matériaux oxydés / patine / living finish** : changement de couleur dû à un usage fréquent.

Matériau	Changement de couleur dû à l'usage	
Bronze foncé (AZ/DB)	Bronze clair	Une utilisation fréquente polit automatiquement le matériau et fait apparaître une légère brillance.
Bronze Vert (VI/OG)	Bronze foncé à bronze clair	
Vieux Étain (OPW)	Argenté	
Métal Brut (RM)	Légère brillance	
Bronze Brut (RB)	Légère brillance	
Bronze Blanc Satiné (WBS)	Légère brillance	

## Finitions avec revêtement

Bien que Dauby utilise un revêtement de qualité exceptionnelle et très résistant, aucun revêtement ne résiste totalement aux rayures. L'aspect dépoli confère à votre produit un caractère authentique !

Matériau	Revêtement	Entretien (si revêtement endommagé)
Fer Vieilli (VO)	Noir	Repeindre
Noir (N)	Noir	Repeindre
Fer Poli (FP)	Vernis	Revernir
Argent Satiné (AS)	Argenté	irréversible
Argent Agée (AI)	Couleur fer	irréversible
Bronze Noir (BLK)	Noir	irréversible
Night Bronze (NIB)	/	irréversible

Aucun revêtement n'est garanti à vie! Des facteurs externes peuvent l'endommager, comme des objets pointus et des bagues. Une utilisation fréquente laisse aussi des traces.

**N'utilisez en aucun cas un nettoyeur abrasif ou agressif!**

# DE Materialanleitung

Jedes Product wurde aus natürlichen Materialien von hoher Qualität hergestellt. Damit Sie diesen einzigartigen Charakter genießen können, finden Sie nachstehend einige typische Eigenschaften unserer Materialien.

Die Farbtöne in unseren Produkten werden im Laufe der Zeit noch intensiver, das sogenannte Living Finish.

Wir empfehlen, den natürlichen Änderungen freien Lauf zu lassen. Dies gibt dem Material eine warme Ausstrahlung und einen authentischen Charakter. **Eine spezielle Pflege ist deshalb nicht erforderlich.**

## Materialien mit Farbänderungen

**Oxidierende Materialien:** Farbänderungen durch externe Faktoren wie Sauerstoff, Wasser, Feuchtigkeit, Sonne usw.

Material	Farbänderung	Pflegetipp
Britannium (BRI) / Altes Nickel (NA)	Mattgrau, Zinnfarbe	Silberputzmittel
Weisse Bronze (WB)	Matter (minimal)	Silberputzmittel
Naturbronze (LB/NB/RBP)	Matter / Dunkelbraun	Kupferputzmittel
Silberbronze (BS)	Mattgrau	Silberputzmittel
Rost (RC)	Bienenwachs	Mit Bienenwachs, Bohnerwachs oder Vaseline polieren
Rohes Messing (UB)	Matter / Dunkelbraun	Kupferputzmittel
Geburstetes Messing (OS)	Dunkler	Chromputzmittel

Wenn Sie dennoch den ursprünglichen leichten Glanz behalten möchten, können Sie die matte Rostschicht mit einem weichen Lappen und Silber- oder Kupferputzmittel polieren.

**Patina / Living Finish:** Farbänderung durch häufige Nutzung

Material	Farbänderung	
Dunkelbronze (AZ/DB)	Naturbronze	Durch häufige Nutzung polieren Sie das Material, wodurch ein leichter Glanz entsteht.
Grünbronze (VI/OG)	Dunkelbronze bis Naturbronze	
Altes Zinn (OPW)	Silberfarbe	
Rohes Metall (RM)	Leichter Glanz	
Rohe Bronze (RB)	Leichter Glanz	
Weisse Bronze Satiniert (WBS)	Leichter Glanz	

## Ausführungen mit Beschichtung

Dauby verwendet eine Beschichtung von aussergewöhnlicher Qualität, die sehr stark ist. Es gibt jedoch keine einzige Beschichtung, die 100% kratzfest ist. Ein verwitterter Look gibt Ihrem Product einen authentischen Charakter!

Material	Beschichtung	Pflege (bei Beschädigung der Beschichtung)
Dunkel Eisen (VO)	Schwarz	Neu lackieren
Schwarz (N)	Schwarz	Neu lackieren
Eisen Poliert (FP)	Klarlack	Mit Klarlack anstreichen
Silberbronze (AS)	Silberfarbig	Unumkehrbar
Dunkel Eisen (AI)	Eisenfarbig	Unumkehrbar
Schwarze Bronze (BLK)	Schwarz	Unumkehrbar
Night Bronze (NIB)	/	Unumkehrbar

Keine einzige Beschichtung hat eine ewige Garantie! Externe Faktoren, wie scharfe Gegenstände und Ringe, können die Beschichtung beschädigen. Auch die langfristige häufige Nutzung hinterlässt ihre Spuren

**Auf keinen Fall aggressive Scheuer - oder Reinigungsmittel verwenden!**

## EN Information about the materials

Each product is made out of premium quality natural materials. We would like to share some specific features of our materials so that you can enjoy their unique character even more.

The colour variations in our products become more intense over time. This is known as living finish.

We advise you to allow the natural changes to follow their course. It gives the material a warm look and authentic character.

**No maintenance is required.**

### Materials with a colour change

**Oxidising materials:** colour change due to external factors such as oxygen, water, moisture, sun, etc.

Material	Colour change over time	Maintenance tip
Britannium (BRI) / Nickel Aged (NA)	Matt grey, tin colour	Silver polish
White Bronze (WB)	A slight matt patina	Silver polish
Natural Bronze (LB/NB/RBP)	A darker matt (brown) patina	Copper polish
Bronze Silver (BS)	Matt grey	Silver polish
Rust (RC)	Natural wax	Polish with beeswax, natural wax or vaseline
Raw Brass (UB)	A darker matt (brown) patina	Copper polish
Brushed Brass (OS)	Darker	Chrome polish

If you wish to maintain the original slight shine, you can polish the dull corrosion layer using a soft cloth and silver or copper polish.

**Oxidised materials / patina / living finish:** colour change caused by usage

Materials	Colour change due to usage	
Dark Bronze (AZ/DB)	Light bronze	With frequent use, you will naturally polish the material and create a slight shine.
Old Green (VI/OG)	Dark bronze to light bronze	
Old Pewter (OPW)	Silver colour	
Raw Metal (RM)	Slight shine	
Raw Bronze (RB)	Slight shine	
Satin White Bronze (WBS)	Slight shine	

### Finishes with a coating

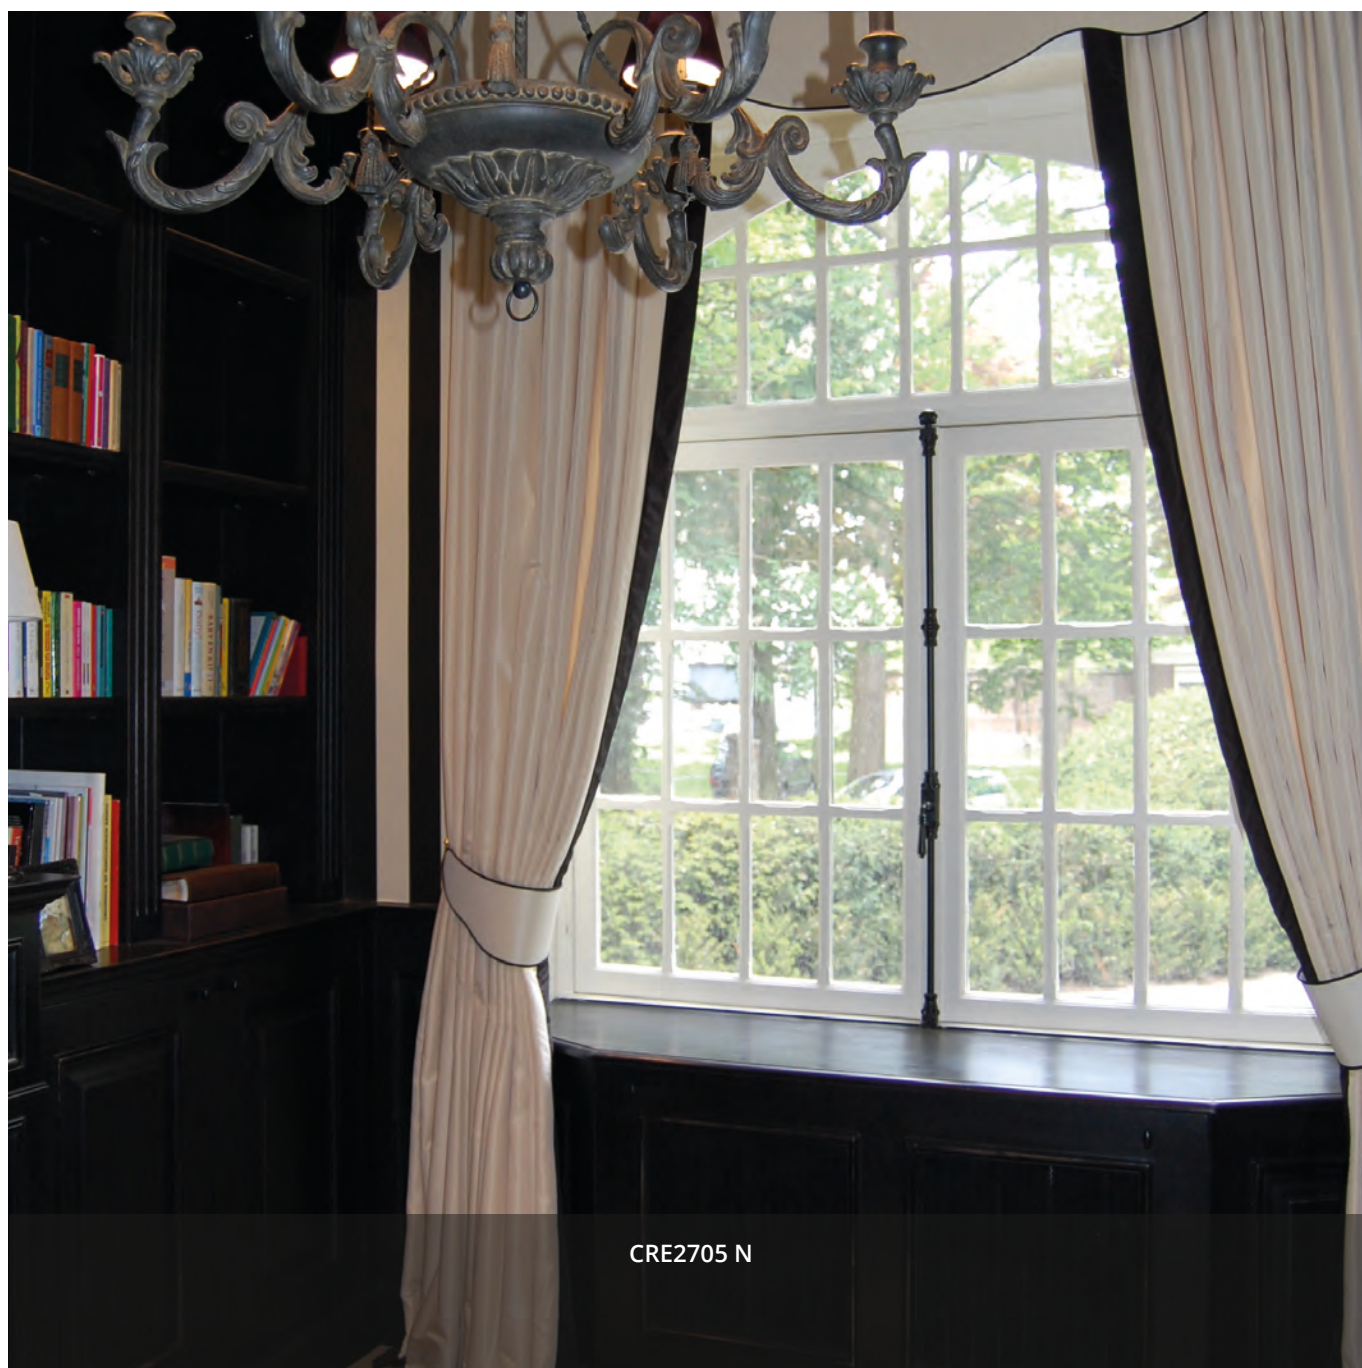

Dauby uses a coating of exceptional quality that is very strong, but no coating is completely scratch-resistant. A weathered look gives your product an authentic character!

Material	Coating	Maintenance (if the coating is damaged)
Aged Iron (VO)	Black	Relacquer
Black (N)	Black	Relacquer
Iron (FP)	Varnish	Revarnish
Aged Silver (AS)	Silver colour	Irreversible
Aged Iron (AI)	Iron colour	Irreversible
Black Bronze (BLK)	Black	Irreversible
Night Bronze (NIB)	/	Irreversible

No coating has a lifetime guarantee! External factors, such as sharp objects and rings, may damage the coating. Long-term and frequent use will also leave its traces.

**Never use abrasive or aggressive detergents !**

## NL Uitvoeringen **Giara® & RDS BRONZE**

**BRI | Britannium**

Britannium metaal is een legering met oa zilver en tin. Bij gebruik vormt zich een matter patina dat het materiaal een authentieke uitstraling geeft. De verweerde look is de charme van het product. Er wordt geen vernis gebruikt, maar desgewenst kan het beslag terug glanzend worden gemaakt door het te onderhouden met zilverpoets.

**WB | Wit Brons**

Wit Brons is een legering van verschillende non ferro-metalen. Doordat deze legering zeer traag oxideert kan u lang genieten van zijn zilverachtige kleur. Na eerst langzaam matter te worden, wordt het donkerder. Zo bekomt men uiteindelijk het Oud Tin (OPW). Wie dit niet mooi vindt, kan de originele kleur terug bekomen met zilverpoets. Wie dit wel mooi vindt, kan best meteen het Oud Tin (OPW) bestellen, want de oxidatie van Wit Brons naar Oud Tin (OPW) beslaat meer dan één mensenleven.

**OPW | Oud Tin**

Zowel het Wit Brons als Oud Tin (OPW) is ideaal voor zowel binnen - als buitengebruik.

**AS | Verouderd Zilver**

**AI | Verouderd IJzer**

Deze materialen hebben als basismateriaal Wit Brons die elk een eigen bovenlaag hebben. De zeer zachte, natuurlijke verwerking die er na een tijd optreedt is onomkeerbaar, doch charmant!

**BLK | Zwart Brons**

**NB | Natuur Brons**

**AZ | Verdonkerd Brons**

Massief brons is een legering van koper en tin. De legering heeft een rode kleur en zal door reactie met zuurstof een bruine oxide laag verkrijgen, het Donker Brons (AZ) is hier het resultaat van. Als we dit dan nog verder laten oxideren krijgen we een groen - bruine oxide laag, namelijk het Groen Brons (VI).

**VI | Groen Brons**

De plaatsen die meer blootgesteld zijn aan zuurstof gaan donkerder worden en waar er meer wrijving is door gebruik zal het lichter worden.

**BRI | Britannium**

Le métal Britannium est un alliage à base d'argent et d'étain notamment. À l'usage, une patine plus mate se forme qui procure au matériau un rayonnement authentique. L'aspect altéré fait le charme du produit, du vernis n'est pas appliqué. Le cas échéant, la quincaillerie peut retrouver sa brillance par application d'un produit d'entretien pour argent.

**WB | Bronze Blanc**

Le Bronze Blanc est un alliage de différents métaux non-ferreux. Étant donné son oxydation très lente, vous profiterez longtemps de son éclat argenté. Ce n'est qu'après être devenu lentement mat que des taches plus sombres apparaîtront après une longue période de temps. C'est ainsi que l'on obtient finalement du Vieil Étain (OPW). Si vous n'aimez pas cette teinte, vous pouvez faire réapparaître la couleur originale à l'aide de polish pour argent. Si, au contraire, vous aimez cette couleur, vous pouvez directement commander le modèle Vieil Étain (OPW) car l'oxydation du Bronze Blanc en Vieil Étain (OPW) dure plus d'une vie humaine. Le Bronze Blanc ainsi que le Vieil Étain (OPW) conviennent parfaitement à l'intérieur comme à l'extérieur.

**OPW | Vieil étain**

**AS | Argent Satiné**

**AI | Argent Agée**

**BLK | Bronze Noir**

Ces matériaux à base de Bronze Blanc possèdent chacun une couche extérieure. L'altération très douce et naturelle qui apparaît après quelque temps est irréversible.

**NB | Bronze Naturel**

**AZ | Bronze Foncé**

**VI | Bronze Vert**

Le bronze massif est un alliage de cuivre et d'étain. Cet alliage possède une couleur rouge qui se teintera de brun en réaction avec l'oxygène, pour donner le Bronze Foncé (AZ). Si l'oxygène continue de faire son effet, nous obtenons alors une couche verte/brune, à savoir le Bronze Vert (VI).

Les endroits les plus exposés à l'oxygène deviendront plus sombres, tandis que les endroits plus exposés à la friction (par ex. contact humain) deviendront plus clairs..

**BRI | Britannium**

Britannium-Metall ist eine Legierung u.a. aus Silber und Zinn. Beim Gebrauch bildet sich eine matte Patina, die dem Material eine authentische Ausstrahlung verleiht. Der verwitterte Look gehört zum Charme des Produktes. Britannium wird nicht lackiert. Wenn gewünscht, kann der Beschlag wieder zum Glänzen gebracht werden, indem er mit Silberputzmittel gepflegt wird.

**WB | Weiße Bronze**

Weissbronze ist eine Legierung verschiedener Nichteisenmetalle. Da diese Legierung sehr langsam oxidiert, können Sie sich lange an der Silberfarbe erfreuen. Die Legierung wird langsam matter und erst nach sehr langer Zeit entstehen dunkle Flecke. So bekommt man letztendlich Altes Zinn (OPW). Wer dies nicht schon findet, kann die Originalfarbe mit Silberputz wiederherstellen. Wem dies aber gefällt, bestellt am besten gleich

**OPW | Altes Zinn**

Altes Zinn (OPW), weil die Oxidation von Weißbronze zu Altes Zinn (OPW) länger als ein Menschenleben dauert.

Sowohl Weißbronze als auch Altes Zinn (OPW) sind geeignet für den Innen- und Aussenbereich.

**AS | Silberbronze****AI | Dunkel Eisen**

Diese Materialien haben Silberbronze als Basismaterial und darüber eine jeweils eigene Oberschicht. Eine sehr leichte natürliche Verwitterung, die im Laufe der Zeit entsteht, ist unumkehrbar.

**BLK | Schwarze Bronze****NB | Naturbronze****AZ | Dunkelbronze**

Naturbronze ist eine Legierung von Bronze und Zinn. Die Legierung hat eine rote Farbe und erhält durch die Reaktion mit Sauerstoff eine braune Oxidschicht, woraus Dunkelbronze (AZ) entsteht. Wenn wir Dunkelbronze weiter oxidieren lassen, erhalten wir eine grünbraune Oxidschicht, Grünbronze (VI).

**VI | Grünbronze**

Stellen, die mehr an Sauerstoff ausgesetzt sind, werden dunkler und Stellen mit mehr Reibung (z. B. menschlicher Kontakt) werden heller.

## UK Finishes **Giara® & RDS BRONZE**

**BRI | Britannium**

Britannium is an alloy of silver and tin. In use it forms a mat patina, which gives the material an authentic character. The weathered look of the product is what gives it its charm. No varnish is used and if desired the fitting can have its shine restored by maintaining it with silver polish.

**WB | White Bronze**

White Bronze is an alloy of various non-ferrous metals. As this alloy oxidises very slowly, it retains its silver colour for a long time. After first very slowly becoming more matt, dark patches start appearing, yet only after a very long time. The eventual result is Old Pewter (OPW). If that doesn't appeal to you, you can restore the original colour using silver polish. However, if you do like it, it is best to order the Old Pewter (OPW) straight away, as the oxidation process from white bronze to Old Pewter (OPW) takes more than a lifetime.

**OPW | Old Pewter**

Both White Bronze and Old Pewter (OPW) are ideal for use indoors and out.

**AS | Aged Silver**

**AI | Aged Iron**

**BLK | Black Bronze**

The basic substance in these materials is White Bronze and each item has its own outer layer. The very gentle, natural weathering that occurs after a time is irreversible.

**NB | Natural Bronze**

**AZ | Dark Bronze**

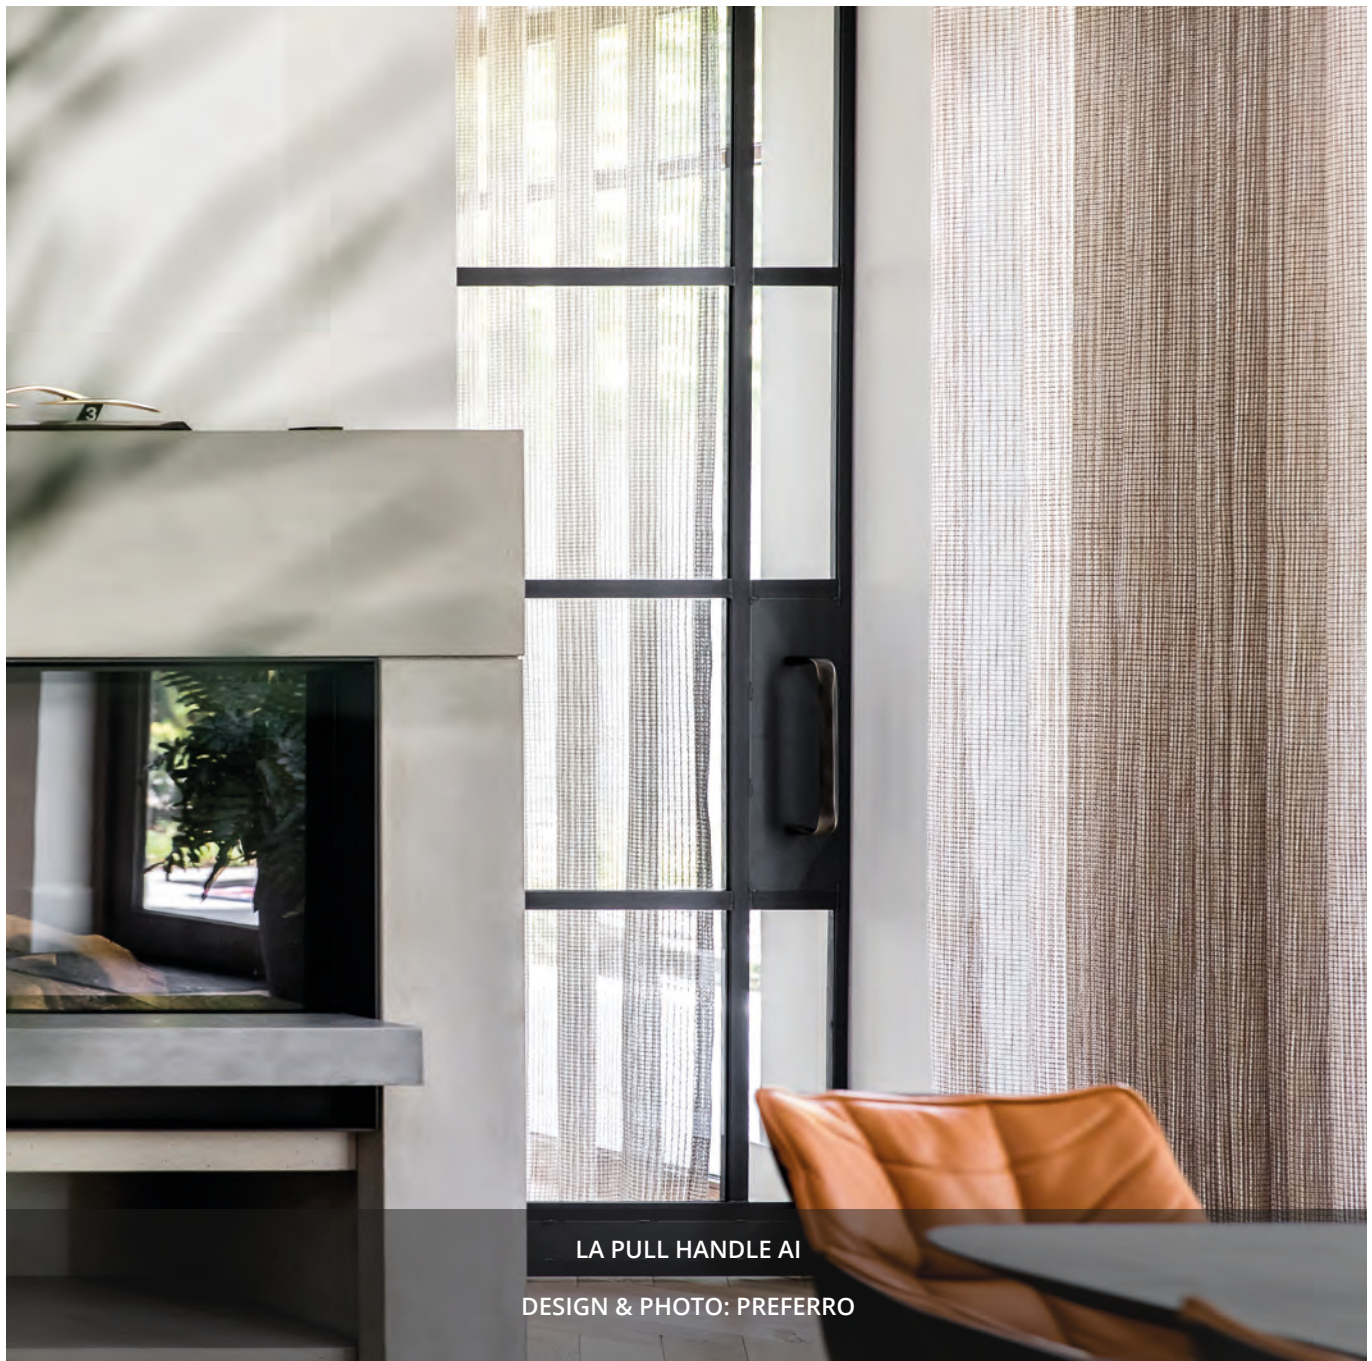

**VI | Green Bronze**

Solid bronze is an alloy of copper and tin. The alloy has a reddish colour and a brown oxide layer will build up as it reacts with oxygen, resulting in the Dark Bronze shade (AZ). If it is allowed to oxidise further, a green-brown oxide layer forms, known as Green Bronze (VI).

Places that are more exposed to oxygen will become darker, while places where there is more friction (for instance due to human contact) will be lighter.

FAMA NB  
DESIGN: FAMA

### **BS | Verzilverd Wit Brons**

Massief brons is een legering van koper en tin. Op het massieve brons wordt een zilverlaag aangebracht van enkele microns dik. De corrosie van het zilver zorgt voor een wat donkere schijn, maar bij gebruik behoudt het product zijn glans, te vergelijken met zilveren juwelen en accessoires.

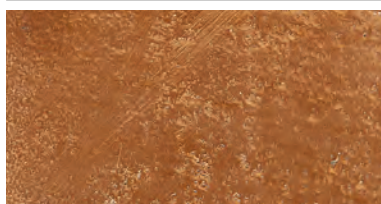

---

### **NA | Verouderd Nikkel**

Massief brons is een legering van koper en tin. Op het massieve brons wordt een tinlaag aangebracht van enkele microns dik.

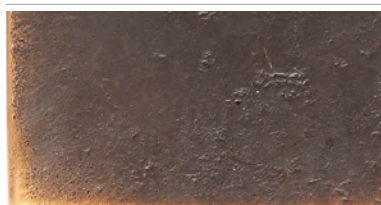

---

### **LB | Natuur Brons**

Massief brons is een legering van koper en tin. De legering heeft een rode kleur en zal door reactie met zuurstof een bruine oxide laag verkrijgen.

---

### **DB | Donker Brons**

Massief brons is een legering van koper en tin. De legering heeft een rode kleur en zal door reactie met zuurstof een bruine oxide laag verkrijgen, het donker brons (DB) is hier het resultaat van. De plaatsen die meer blootgesteld zijn aan zuurstof gaan donkerder worden en waar dat er meer wrijving is (vb. menselijk contact) gaat het lichter worden.

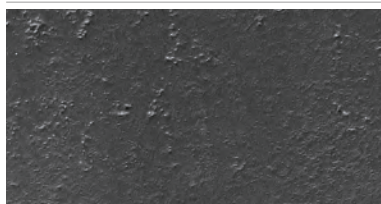

---

### **OG | Groen Brons**

Massief brons is een legering van koper en tin. De legering heeft een rode kleur en zal door reactie met zuurstof een bruine oxide laag verkrijgen, het donker brons (DB) is hier het resultaat van. Als we dit dan nog verder laten oxideren krijgen we groen – bruine oxide laag, namelijk het groen brons (OG). De plaatsen die meer blootgesteld zijn aan zuurstof gaan donkerder worden en waar dat er meer wrijving is (vb. menselijk contact) gaat het lichter worden.

---

### **BLK | Zwart Brons**

Massief brons is een legering van koper en tin. Op het massive brons wordt een zwarte laklaag aangebracht. De natuurlijk verwerking is onomkeerbaar.

---

### **NIB | Night Bronze**

Massief brons is een legering van koper en tin. Op het massive brons wordt een bruine laklaag aangebracht. De natuurlijk verwerking is onomkeerbaar.

---

### **UB | Ruw Messing**

Natuurlijk, zandgegoten messing met een ruwe look. Het messing zal door reactie met zuurstof een donkere patine verkrijgen.

### BS | Bronze Argent

Le bronze massif est un alliage de cuivre et d'étain. Une couche d'argent de quelques microns d'épaisseur est appliquée sur le bronze massif. La corrosion de l'argent se traduit par un reflet légèrement plus foncé, mais une fois utilisé, le produit conserve sa brillance, à comparer avec les bijoux et accessoires en argent.

### NA | Nickel Vieilli

Le bronze massif est un alliage de cuivre et d'étain. Cet alliage possède une couleur rouge qui se teintera de brun en réaction avec l'oxygène.

### LB | Bronze Naturel

Le bronze massif est un alliage de cuivre et d'étain. Cet alliage possède une couleur rouge qui se teintera de brun en réaction avec l'oxygène.

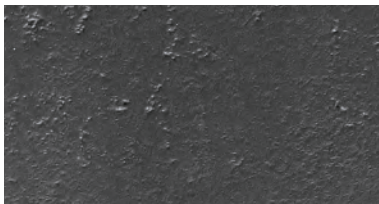

### DB | Bronze Foncé

Le bronze massif est un alliage de cuivre et d'étain. Cet alliage possède une couleur rouge qui se teintera de brun en réaction avec l'oxygène, pour donner le bronze foncé (DB). Les endroits les plus exposés à l'oxygène deviendront plus sombres, tandis que les endroits plus exposés à la friction (par ex. contact humain) deviendront plus clairs.

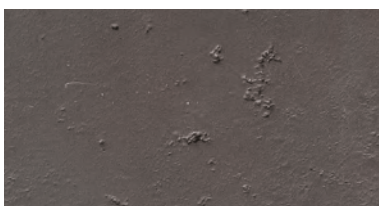

### OG | Bronze Vert

Le bronze massif est un alliage de cuivre et d'étain. Cet alliage possède une couleur rouge qui se teintera de brun en réaction avec l'oxygène, pour donner le bronze foncé (DB). Si l'oxygène continue de faire son effet, nous obtenons alors une couche verte/brune, à savoir le bronze vert (OG). Les endroits les plus exposés à l'oxygène deviendront plus sombres, tandis que les endroits plus exposés à la friction (par ex. contact humain) deviendront plus clairs.

### BLK | Bronze Noir

Le bronze massif est un alliage de cuivre et d'étain. Une couche de laque noire est appliquée sur le bronze massif. L'altération naturelle est irréversible.

### NIB | Night Bronze

Le bronze massif est un alliage de cuivre et d'étain. Une couche de laque brune est appliquée sur le bronze massif. L'altération naturelle est irréversible.

### UB | Laiton Brut

Laiton naturel coulé au sable dans sa forme la plus brute. Le laiton va acquérir une patine foncée en réagissant avec l'oxygène.

## D Ausführungen Fama

### BS | Silberbronze

Massive Bronze ist eine Legierung aus Kupfer und Zinn. Auf die massive Bronze wird eine wenige Mikrometer dicke Silberschicht aufgetragen. Die Korrosion des Silbers bildet einen etwas dunkleren Schimmer, aber während des Gebrauchs behält das Produkt seinen Glanz, vergleichbar mit Silberschmuck und silbernen Accessoires.

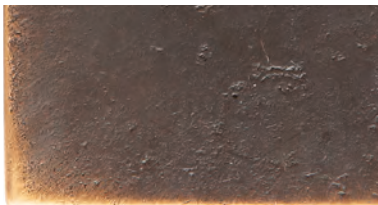

### NA | Altes Nickel

Massive Bronze ist eine Legierung aus Kupfer und Zinn. Es wird eine Mikrometer-Schicht Zinn auf die massive Bronze aufgebracht.

### LB | Naturbronze

Massivbronze ist eine Legierung von Bronze und Zinn. Die Legierung hat eine rote Farbe und erhält durch die Reaktion mit Sauerstoff eine braune Oxidschicht. Die Stellen, die mehr Sauerstoff ausgesetzt sind, werden dunkler und die Stellen mit mehr Reibung (z. B. menschlicher Kontakt) werden heller.

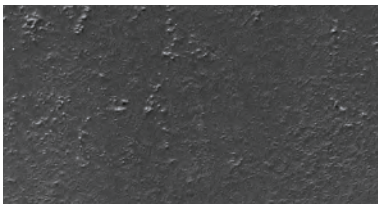

### DB | Dunkelbronze

Massivbronze ist eine Legierung von Bronze und Zinn. Die Legierung hat eine rote Farbe und erhält durch die Reaktion mit Sauerstoff eine braune Oxidschicht, woraus Dunkelbronze (DB) entsteht. Die Stellen, die mehr Sauerstoff ausgesetzt sind, werden dunkler und die Stellen mit mehr Reibung (z. B. menschlicher Kontakt) werden heller.

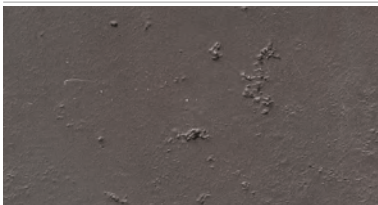

### OG | Grünbronze

Massivbronze ist eine Legierung von Bronze und Zinn. Die Legierung hat eine rote Farbe und erhält durch die Reaktion mit Sauerstoff eine braune Oxidschicht, woraus Dunkelbronze (DB) entsteht. Wenn wir Dunkelbronze weiter oxidieren lassen, erhalten wir eine grünbraune Oxidschicht, Grünbronze (OG). Die Stellen, die mehr Sauerstoff ausgesetzt sind, werden dunkler und die Stellen mit mehr Reibung (z. B. menschlicher Kontakt) werden heller.

### BLK | Schwarze Bronze

Massivbronze ist eine Legierung von Bronze und Zinn. Es wird eine schwarze Lackschicht auf die massive Bronze aufgebracht. Die natürliche Verwitterung ist unumkehrbar.

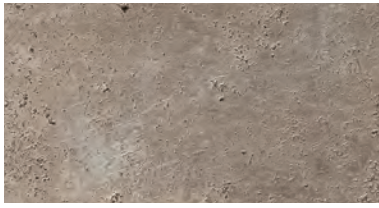

### NIB | Night Bronze

Massivbronze ist eine Legierung von Bronze und Zinn. Es wird eine braune Lackschicht auf die massive Bronze aufgebracht. Die natürliche Verwitterung ist unumkehrbar..

### UB | Rohes Messing

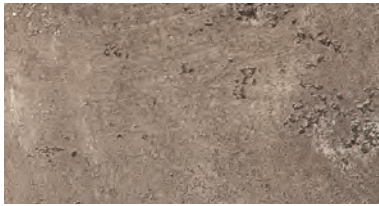

Natürlich, rohes Messing, das durch den Sandguss hergestellt wurde. Dieses Messing reagiert so auf den Sauerstoff, dass es eine dunkle Patina bekommt.

**BS | Bronze Silver**

Solid bronze is an alloy of copper and tin. A layer of silver a few microns thick is applied to the solid bronze. Corrosion of the silver gives a rather darker sheen, but the product maintains its gloss while in use, in the same way as silver jewellery and accessories.

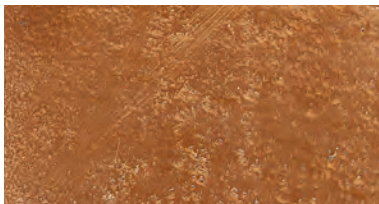

---

**NA | Nickel Aged**

Solid bronze is an alloy of copper and tin. A pewter coating of just a couple of microns is being applied to the solid bronze base material.

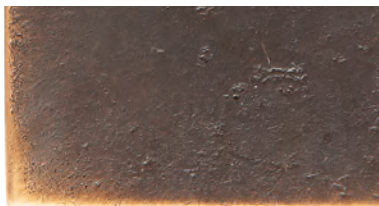

---

**LB | Natural Bronze**

Solid bronze is an alloy of copper and tin. The alloy has a reddish colour and a brown oxide layer will build up as it reacts with oxygen.

---

**DB | Dark Bronze**

Solid bronze is an alloy of copper and tin. The alloy has a reddish colour and a brown oxide layer will build up as it reacts with oxygen, resulting in the dark bronze shade (DB). Places that are more exposed to oxygen will become darker, while places where there is more friction (for instance due to human contact) will be lighter.

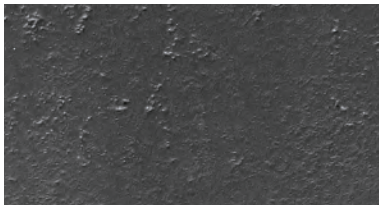

---

**OG | Green Bronze**

Solid bronze is an alloy of copper and tin. The alloy has a reddish colour and a brown oxide layer will build up as it reacts with oxygen, resulting in the dark bronze shade (DB). If it is allowed to oxidise further, a green-brown oxide layer forms, known as green bronze (OG). Places that are more exposed to oxygen will become darker, while places where there is more friction (for instance due to human contact) will be lighter.

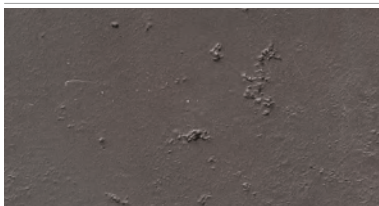

---

**BLK | Black Bronze**

Solid bronze is an alloy of copper and tin. Solid bronze is lacquered in a matt black finish. The natural wear of paint is irreversible.

---

**NIB | Night Bronze**

Solid bronze is an alloy of copper and tin. Solid bronze is lacquered in a brown finish. The natural wear of paint is irreversible.

---

**UB | Raw Brass**

Natural, sand cast brass in its most authentic form. The brass material is subjective to its environment. Factors like oxygen and humidity will grant it an ever changing, darkening patina.

Hoe bestellen?	Comment?   <b>Fama Artwork</b>
1. Kies het model	1. Choisissez le modèle
2. Kies de maat	2. Choisissez la dimension
3. Kies de tekening	3. Choisissez le dessin
4. Kies de uitvoering	4. Choisissez la finition
5. Gebruik tabel voor de prijs (Elk artikelnummer is geen uniek nummer)	5. Utiliser le tableau pour calculer le prix (chaque numéro d'article n'a pas de numéro unique)
6. Dubbelcheck de bestelling (Dit wordt exclusief op maat gemaakt)	6. Vérifier la commande (Cette collection est fabriqué exclusivement sur mesure)

Wie bestellen?	How to order?   <b>Fama Artwork</b>
1. Wähle das Modell	1. Choose model
2. Wähle das Maß	2. Choose size
3. Wähle die Struktur	3. Choose print
4. Wähle die Farbe	4. Choose finish
5. Benutze die Tabelle um den Preis herauszufinden (Jede Artikelnummer is kein eindeutige Nummer)	5. Use table for price indication (Every article number is not a unique number)
6. Kontrolliere die Bestellung (Jede Bestellung wird individuell angefertigt)	6. Double check order (This is exclusively hand-made)

**Voor modellen zonder Artwork ga naar de collectie Fama Design, p. 315.  
Pour les modèles sans illustration Artwork, consultez la collection Fama Design, page 315.**

**Modelle ohne eine Struktur finden Sie in der Kollektion Fama Design, S.315.**

**(Most of) these items are also available without any engravement. See "Fama Design" starting on page 315.**

## ROSETTA BASSA - SLIM ROSE

---

Thin is the new low-profile rose system introduced by Frascio, low profile thickness and ready to install without additional modifications on the door.

- Fast and clean to install
- NO additional drilling steps required and therefore NO mess and much less time needed for installation
- 5mm low profile thickness, yet still contains a spring system for years of attractive, trouble-free operation
